

OTC Seller Portal

OTC Marketplace Seller Portal

Enabling Sellers to List products & Process orders on the Platform

Platform	Duration	Project Involvement
Web	10 weeks Nov 2022	Design Manager

About

B2C OTC (Over the Counter) marketplace sellers have to currently rely on external aggregators like Unicommerce, EasyEcom and Vinculum to update inventory and process Pharomeasy orders. This is because the partner portal (web and m-site) didn't have the update Inventory and Order Processing functionalities for marketplace sellers.

Problem

- OTC Business Team incurs 50k for paying to Unicommerce
- Sellers don't want to join Marketplace Platform as they don't want to use aggregators
- Inventory Updation TAT is too High currently

My Role

Design Manager, 1 Lead Designer, 1 PM, Engineering Lead, 2 Engineers, 1 QA

Led the design & strategy of the entire project. I along with one lead designer conducted 30 minute interview sessions with 6 Sellers with the help of PM's and

Account Managers. We recorded these conversations, created affinity mapping and then synthesised feedback.

Existing Design

Account Manager uploads Csv file to upload seller catalogue & creates password for Unicommerce.

Current Design Challenges

- Listing Onboarding TAT was too High
- Business Team's bandwidth was spread due to heavy operations
- Marketplace Sellers were incurring high cost

Users

- Account Managers - Responsible for managing multiple sellers
- Seller (Owner) - View the Sales, Returns, Cancellations of 1 or more location
- Seller Staff - Responsible for Creating listing & Processing orders

Key Insights from Research

- Sellers are listed on multiple platforms like Amazon, Flipkart
- Seller use a combination of sales model (Fulfilled by Amazon, Flex, EasyShip so on)
- They want to have seller friendly policies
- Performance data that helps reduce returns, sales data, cancellations
- They need Flexible self serve onboarding process
- Sellers forum is important to resolve issues

Solution

Build an intuitive listing and order processing module for marketplace sellers that will help them to Add Listings & Process Orders Quickly.

My Listing

Sellers have the ability view the listings created via single or bulk upload functionality

Add Single Product

Sellers can now add an existing product from the Pharameasy Catalogue

Add Bulk Listings

Sellers now have the ability to upload multiple products via file upload.

Dashboard

Sellers now have performance data that helps reduce returns, track sales and cancellations.

Outcome

Built from 0-1 & Scaled from 10 sellers to 236 sellers with 8960 orders processed daily with an AOV (avg order value of 850)

	Sellers	Active Listings	Orders
Dec 2022	10	1978	480
Apr 2024	236	25,692	8960
